Table of contents

Chapter 1. ‘Genes’ and ‘information’ as conceptual problems	13
Chapter 2. The problem of the gene	25
1. The birth of the ‘gene’ as an instrumental concept	27
2. The fruitful tension between instrumentalist and realist views of the gene	29
3. Genes as units in Mendelian genetics	30
4. The classical molecular gene concept	32
5. The golden years of molecular genetics	35
6. How the gene concept became a problem: why is the gene not a structural unit?	36
7. How the gene concept became a problem: why is the gene not a functional unit?	49
8. What is a gene, after all?	51
9. The gene in the era of genomics and systems biology	52
10. Some reactions to the problem of the gene	58
Conceptual variation and ambiguities in the gene concept ..	58
Searching for a single, inclusive gene concept	60
The process molecular gene concept	61
Gene-P and gene-D	65
Genes as sets of domains in DNA	67
The systemic gene concept	70
11. But... what about ‘information’?	73
Chapter 3. Biosemiotics and information talk in biology	75
Chapter 4. Information and semiosis in Peirce’s science of signs	85
1. Introduction	87
2. Some basic ideas in Peirce’s semiotics	87
3. Kinds of Objects and Interpretants	91
4. Semiosis, information, and meaning	92
Chapter 5. Some other ideas about information	97
1. Information theory	99

- 2. Bateson's understanding of information as a difference which makes a difference 100
- 3. Jablonka's concept of semantic information 103
- 4. Concluding remarks 109

Chapter 6. A semiotic analysis of genes and genetic information: First take 113

- 1. Information talk in action: a textbook description of the 'flow of information' in a cell 115
- 2. A general semiotic analysis of the gene as a Sign 124

Chapter 7. Emergence of semiosis: A general model 137

- 1. A multi-level approach to the emergence of semiosis in semiotic systems 139
- 2. Semiosis as an emergent process 145
 - 2.1. Central characteristics of emergentism: what questions about semiosis do they raise? 148
 - 2.2. Varieties of emergentism and questions about semiosis 151
 - Modes of irreducibility 151
 - Downward determination 155
 - Unpredictability 162
 - 2.3. Answering the questions about semiosis 163
 - What is a semiotic system? 163
 - Are semiotic systems physically constituted? 164
 - Are semiotic systems new? 165
 - Is semiosis a systemic process? 169
 - Is semiosis synchronically determined by the properties and arrangement of the parts in a semiotic system? 170
 - In what sense is semiosis irreducible? 175
 - Is downward determination involved in semiosis? 176
 - Is the structure of semiotic systems or processes unpredictable? 177
- 3. Concluding remarks 178

Chapter 8. Levels of semiosis in the genetic information system 181

- 1. The micro-semiotic level: strings of DNA as potential Signs .. 183

Table of contents

2. Transcription, RNA processing, and protein synthesis as processes of gene actualization	186
3. Semiotic analysis of transcription	188
4. Semiotic analysis of protein synthesis	190
5. A global picture	194
Chapter 9. Genes, information, and semiosis	205
1. What is genetic information?	207
2. What is a gene? A more radical interpretation	214
3. Concluding remarks	221
References	227
Index of names	246
The authors	251

The authors

Charbel Niño EL-HANI is a Professor at the Institute of Biology, Federal University of Bahia, Brazil <charbel@ufba.br>. His research interests are philosophy of biology, biosemiotics, science education research, and animal behavior. His publications include ‘Gene concepts in higher education cell and molecular biology textbooks’ (with M. A. Pitombo and A. M. R. Almeida, 2008, *Science Education International* 19); ‘Multi-cultural education, pragmatism, and the goals of science teaching’ (with E. F. Mortimer, 2007, *Cultural Studies of Science Education* 2); ‘Between the cross and the sword: the crisis of the gene concept’ (2007, *Genetics and Molecular Biology* 30); ‘Towards a multi-level approach to the emergence of meaning processes in living systems’ (with J. Queiroz, 2006, *Acta Biotheoretica* 54); ‘A semiotic analysis of the genetic information system’ (with J. Queiroz and C. Emmeche, 2006, *Semiotica* 160); ‘Semiosis as an emergent process’ (with J. Queiroz, 2006, *Transactions of the Charles Sanders Peirce Society* 42); ‘Information and semiosis in living systems: A biosemiotic approach’ (with J. Queiroz and C. Emmeche, 2005, *S.E.E.D. Journal* 5); ‘On some theoretical grounds for an organism-centered biology: Property emergence, supervenience, and downward causation’ (with C. Emmeche, 2000, *Theory in Biosciences* 119). *Evolução: O Sentido da Biologia* (with D. Meyer, UNESP Publishing House, Brazil).

João QUEIROZ is a Professor at the Graduate Studies Program on History, Philosophy, and Science Teaching (UFBA/UEFS), Federal University of Bahia, Brazil, director of the Group for Research on Artificial Cognition (UEFS) and associate researcher at the Dept. of Computer Engineering and Industrial Automation, State University of Campinas <queirozj@ecomp.uefs.com> <www.semiotics.pro.br>. His research interests are Peirce’s semiotics, american pragmatism and cognitive science. His publications include *Computação, Cognição, Semiose* (with A. Loula and R. Gudwin, 2007, EDUFBA); *Semiotics and Intelligent Systems Development* (with R. Gudwin, 2007, Idea Group); *Advanced Issues in Cognitive Science and Semiotics* (with P. Farias, 2006, Shaker Verlag); *Semiose segundo Peirce* (2004, EDUC); ‘Abduction — between subjectivity and objectivity’ (with F. Merrell, 2005, *Semiotica* 153).

2
Jens EMMECHE is Associate Professor and Director at the Center for the Philosophy of Nature and Science Studies, University of Copenhagen, Denmark <emmeche@nbi.dk>. His research interests are biosemiotics, philosophy of biology, and theoretical biology. His publications include 'On some theoretical grounds for an organism-centered biology: Property emergence, supervenience, and downward causation' (with C. N. El-Hani, 2000, in *Theory in Biosciences* 119); *Reading Hoffmeyer, Rethinking Biology* (with K. Kull and Frederik Stjernfelt, 2002, Tartu Semiotics Library 3), 'The chicken and the Orphean egg: On the function of meaning and the meaning of function' (2002, in *Sign Systems Studies* 30); 'Causal processes, semiosis, and consciousness' (2004, in Johanna Seibt (ed.), *Process Theories: Crossdisciplinary Studies in Dynamic Categories*. Dordrecht: Kluwer).
